neat.center
Extend their sound and vision.

Dynamic Best View

Provide up to **11 cameras** and **66 mics** to your meeting room

Multi-camera approach with **best viewing angle** of each participant independently

neat.
neat.

Neat Audio

A connected and intelligent environment

With **Neat Sense**, gather real-time insights of your meeting spaces usage through our embedded sensors: people count, room lighting, air quality, temperature and humidity.

Automatic sleep mode when no one is detected and **reactivation** as soon as someone enters the room, ready for a meeting.

Reduce energy consumption by avoiding unnecessary regulation of the temperature in empty rooms. Neat helps you adopting a more responsible and sustainable approach.

Supported languages on Neat Sense APIs :

`Curl · Java · Android · Obj-C · JavaScript · C# · PHP · Perl · Python · Rust`
